

1 Testing u3d file in PDF

Click on region below. A warning appears: "Multimedia and 3D content has been disabled. Enable this feature if you trust this document." Choose one of the options to trust this document. Click on the figure and the object loads. The three lines with 3Dcoo, 3Droo, 3Dlights can be generated by adding the

Figure 1: Red Cube

menu option 3Dmenu after 3Dtoolbar. Then activate the figure and right-click on it and choose Generate Default view. A javascript debugger appears, which gives default coordinates that can be copied into the includemedia options above for easier startup next time.
